WORK EXPERIENCE

Software Engineer

Renewtrak | July 2023 - Present

- Frontend-focused Angular engineer, leading development and maintenance of the company components and themes libraries, and the analysis and integration of 3rd party libraries
- Co-developed a redesigned customer portal with backwards compatibility to support existing customer configurations, and new functionality
- Collaborated closely with designers during refinements and implementation to ensure a great customer user experience with a highly useable interface

Software Engineer

Vista Entertainment Solutions | Feb 2022 - June 2023

- Full-stack developer (Angular, .NET & MSSQL) for new features, internal and customer bugs across multiple product suites complete with unit testing
- Experience as 'Mission Lead' for new customer-requested features
- Managed communications between business analysts, designers, testers, architects and other developers
- Maintained multiple release and support versions of software

Database Engineer Intern

Piper's Patent Attorneys | Summer 2021

- Wrote scripts to migrate data from a legacy database system to a modern technology (Visual FoxPro >>> PostgreSQL)
- Reimplemented legacy database sync system to support running both the legacy and new system concurrently

Software Developer Intern

Motion Design | Summer 2020

- Worked as a full-stack developer (React, Kotlin & PostgreSQL) on a Web App with an Agile CI/CD git workflow

EDUCATION

University of Auckland

Bachelor of Software Engineering with First Class Honours | 2018 - 2021

- GPA: 7.8/9
- Dean's list for academic achievement in 2018 and 2020

Auckland Grammar School

A Level Cambridge | Graduated 2017

PERSONAL PROJECTS

Tetrus

Web version of the classic block stacker game, with a twist

- Created using Godot Engine and deployed using Github CI/CD
- Play it here: <https://brickahax.github.io/tetrus-game>
